# INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

			•		
<u> </u>	Box	No. I Basis of the report			
1.	Witi filed	h regard to the <b>language</b> , this d, unless otherwise indicated t	s report is based on the international application in the language in which it wa under this item.		
		which is the language of a transitional search (und publication of the international	slations from the original language into the following language, ranslation furnished for the purposes of: for Rules 12.3 and 23.1(b)) tional application (under Rule 12.4) examination (under Rules 55.2 and/or 55.3)		
2.	hav	With regard to the <b>elements*</b> of the international application, this report is based on <i>(replacement sheets which</i> have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):			
	Des	scription, Pages			
	1-1	5	as originally filed		
	Cla	ims, Numbers			
	1-1	6	as originally filed		
	Dra	awings, Sheets			
	1/6-	-6/6	as originally filed		
		a sequence listing and/or ar	ny related table(s) - see Supplemental Box Relating to Sequence Listing		
3.		The amendments have result the description, pages the claims, Nos. the drawings, sheets/figs the sequence listing (special any table(s) related to se	ecify):		
4.	Su	d not been made, since they implemental Box (Rule 70.2(c))  the description, pages the claims, Nos. the drawings, sheets/figs the sequence listing (specified any table(s) related to see	s <i>ecify)</i> : equence listing <i>(specify)</i> :		
	*	If item 4 applies, so	ome or all of these sheets may be marked "superseded."		

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

PCT/CH2004/000032

#### Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: WO94/01262 A

The document D1 is regarded as being the closest prior art to the subject-matter of claim 1 and shows also a process for manufacturing an element having structured surface with structural features comprising the steps of

- a- providing a replication tool (9) having, on a replication surface negative structure features being a negative of at least some of the structural features being a negative of at least some fo the structure features,
- b- providing a preliminary product (10) having a material component in a plastically deformable or viscous or liquid state, and
- c- bringing said material component in contact with said replication surface and thus replicating from the replication surface, the structured surface.

The subject-matter of claim 1 differs from this known method by the provision of a spacer portion protruding from the replication surface and by the spacer portion abutting against a stop surface while bringing the material component in contact with the replication surface.

The subject-matter of claim 1 is therefore new (Article 33(2) PCT).

The problem to be solved by the present invention underlying the distinguishing features of claim 1 may be regarded as to provide an accurate thickness control.

The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) since the additional measures taken in claim 1 are considered to be neither obvious to the man skilled in the art nor disclosed by known prior art references.

For the same reasons the subject-matters of independent claims 6, 13 and 16 are also

PCT/CH2004/000032

considered as novel and to involve an inventive step, since they also include the same special technical features.

Claims 2-5, respectively 7-12 and 14-15 are dependent on claim 1, respectively claims 6 and 13 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
